I would (personally) recommend this Certificate in Digital Insurance from **The Digital Insurer** for people at all levels and stages of their insurance career. Covers the entire insurance value chain across 56 flexible & user friendly modules. High quality presenters and wide range of SMEs & thought leaders. Really good use of my garden leave containment in HK

Happy to announce that I have completed TDI's - Certificate in Digital Insurance. I should likely update it to the ADI moving forward. Its a fantastic program to gain insights on how new technologies should innovate/disrupt the Insurance Value Chain and address current pain points. The case study model helps one understand how companies like Ping An, Zhong An, AIA, Lemonade, PolicyBazaar etc. create the magic for their end users. These companies are light years ahead of what we see day in day out. Highly recommended in terms of the content delivered and subject matters engaged globally! **#digital #insurance**

**I found the courses material engaging especially around microinsurances, on-demand and comparison sites. Humour is always appreciated!**

CDI PARTICIPANT

**It was very interesting to learn about all new technologies available to be applied to the insurance industry.**
